

AGENDA

EAST ORANGE COUNTY WATER DISTRICT ENGINEERING AND OPERATIONS COMMITTEE MEETING

Monday, October 6, 2025 at 9:00 A.M. 185 N. McPherson Road, Orange, CA

- 1. Call meeting to order
- 2. Public communications to the Committee
- 3. Additional items arising after posting of agenda

Informational Items

- 4. Operations Report Retail, Wholesale, and Sewer System Status
- 5. CIP Updates
- 6. Local Hazard Mitigation Plan Update

Action Items

- 7. Sewer Vehicle Purchase Combination Vacuum Excavation Truck
- 8. Sewer Vehicle Purchase Dump Truck

Adjournment

Members of the public shall be permitted to speak as to both agendized and non-agendized items, as reflected in the agenda. Those wishing to speak may submit a speaker request or by verbally indicating their desire to comment at the time the item is called. Additionally, members of the public may, but are not required to, e-mail comments to Sylvia Prado at sprado@eocwd.com up to 30 minutes before the Committee meeting, and such comments shall be provided to the Committee. Members of the public wishing to attend the meeting that require disability-related or other reasonable modifications or accommodation to facilitate such attendance should contact Ms. Prado at (714) 538-5815 or the e-mail provided as soon as feasible before the meeting to make such request.

Availability of agenda materials: Agenda exhibits and other writings that are disclosable public records distributed to all or a majority of the members of the East Orange County Water District Engineering & Operations Committee in connection with a matter subject to discussion or consideration at an open meeting of the Engineering & Operations Committee are available for public inspection in the District's office, 185 McPherson Road, Orange, California ("District Office"). If such writings are distributed to members of the Committee less than 72 hours prior to the meeting, they will be available via phone or email request to Ms. Prado at (714) 538-5815 or sprado@eocwd.com.

TO: ENGINEERING AND OPERATIONS COMMITTEE

FROM: GENERAL MANAGER

SUBJECT: OPERATIONS REPORT - RETAIL, WHOLESALE, AND SEWER SYSTEM STATUS

DATE: OCTOBER 6, 2025

Background

This memo serves as cover for the Operations Report for the Retail, Wholesale, and Sewer systems status. Handouts at the meeting may include Retail water use and well reports, Wholesale demands and imported water reports, and Sewer system status and permit reports.

FROM: GENERAL MANAGER

SUBJECT: LOCAL HAZARD MITIGATION PLAN UPDATE

DATE: OCTOBER 6, 2025

Background

In December 2024, the Board approved a contract with Herndon Solutions Group (HSG) to update the Local Hazard Mitigation Plan (LHMP), a five-year strategic plan to improve resilience to local hazard events. Staff prepared the LHMP with support from key stakeholders and technical consultants. Staff released this plan for public review on October 3, 2025 for a 21-day period. Upon completion of this review period, the plan will be transmitted to the California Office of Emergency Services and Federal Emergency Management Agency (FEMA) for review and approval.

The 2025 LHMP summarizes the natural and human-caused hazards that threaten the District and community, including drought, flooding, earthquakes, and wildfires. As a part of this process, the Plan identifies how climate change is expected to affect future hazards. The LHMP analyzes how community members, buildings, and infrastructure are vulnerable to these threats and potential mitigation strategies to improve overall resilience.

In addition to protecting EOCWD from current and future hazards, having an LHMP will allow the District to maintain eligibility for grants from FEMA for additional hazard mitigation efforts in accordance with the Disaster Mitigation Act of 2000. The District's 2020 plan was instrumental in identifying vulnerabilities and securing FEMA grant funding for the replacement of the 6MG reservoir.

SUBJECT: SEWER COMBINATION VACUUM EXCAVATION TRUCK PURCHASE

DATE: OCTOBER 6, 2025

Background

The District's existing Vactor combination jetting / vacuum (Combo) truck was purchased in 2021. The Combo truck is primarily used for cleaning sewer lines but has also been used to hydro-excavate near and around existing utilities when performing various repair and replacement activities. The ability to hydro-excavate has greatly improved the efficiency of field operations especially when responding to water mainline breaks. The existing Combo truck utilizes a Rapid Deployment Boom (RDB 1015™) which includes a retractable suction hose assembly, thus eliminating the need to assemble sections of tubing to the vacuum boom normally found on traditional combo trucks while enabling a quick response to spill cleanup.

While typical useful life of a Combo truck is estimated around 8 years, the existing Combo truck has been unreliable and has required multiple major repairs in recent years. In 2024, the Jet Rodder® pump and hydraulic motor were replaced for about \$38,000. This year, the Combo truck experienced additional mechanical failures which has led to several instances of the truck not being available for use. The RDB has been the cause of many issues ranging from clogging to being unable to retract the hose assembly and is the reason why the Combo truck is currently at Haaker (Vactor's direct repair shop) with an estimated cost to repair/replace the RDB at over \$25,000. The existing truck contains proprietary Vactor components, which restricts the ability to quickly replace parts when they fail. There have been minor breakdowns as well, but even minor repairs require time to fix, which takes the Combo truck out of service while staff adjusts field activities accordingly. The ongoing issues with the truck have impacted the cleaning schedule with the time spent to routinely have the truck serviced. In addition, the reliability issues are of major concern in the event an emergency response is required.

Staff reached out to several vendors to identify replacement Combo trucks with components that could mitigate some of the current issues. By switching to a traditional telescoping boom instead of the RDB, staff should be able to resolve any future issues across multiple repair shops in a timelier manner, thus reducing downtime. With a front mounted hose reel with hydraulic controls instead of electronic controls, there should be less electronic failure points. A triplex water pump system instead of the Rodder pump will reduce the reliance on costly proprietary repairs. Other components of a replacement Combo truck include a positive displacement blower for vacuum function, which staff could repair with off-the-shelf parts if needed.

The current lead time to receive a Combo truck, from time of purchase, is estimated at about 10 to 12 months. With the recent repairs on the existing truck, staff believes that there will be some resale value when the truck becomes surplus in the future.

Three quotes for the new Combo truck are provided below, and all include taxes, freight, and a Sourcewell discount:

Sewer Combo Truck Quote Summary		
Plumbers Depot (Gap Vax)	\$822,232.63	
Texas Tooling (Huber)	\$827,756.35	
WECO (Gap Vax)	\$933,681.92	

In case there are minor adjustments to tax or freight, staff propose including a 5% contingency to cover these items.

Staff proposed an overall budget of \$1,000,000 for FY25-26 sewer vehicles and equipment and the table below summarizes vehicles already purchased and proposed to be purchased:

Sewer Vehicles and Equipment (Capital) Summary		
Sewer Pool Vehicle – EV (purchased, in use)	\$	35,500
Sewer Combo Truck with contingency (pending approval)	\$	863,344
Sewer Dump Truck with contingency (pending approval)	\$	97,003
Subtotal All Vehicles	\$	995,847
FY25-26 Budget	\$1	,000,000

Recommendation

That the Committee recommend that the Board authorize the General Manager to execute a Purchase Order in the amount of \$822,233 with Plumbers Depot with an additional 5% contingency for a total not to exceed expenditure of \$863,344.

SUBJECT: SEWER DUMP TRUCK PURCHASE

DATE: OCTOBER 6, 2025

Background

District fleet includes a single dump truck that is used daily for a variety of field activities. The dump truck is used for hauling materials and equipment throughout the District's service areas. Since there are multiple crews working at various locations, logistics of transporting material or equipment can be challenging at times. Often times one crew will wait for the dump truck to become available to receive materials needed to complete a job. Staff has determined that the addition of a dump truck will increase operational efficiency as crews will have the appropriate resources available when needed. Having an additional dump truck available during an emergency would be advantageous as two trucks could be running simultaneously to a single site to increase response time.

Staff reached out to several vendors for a Ford Super Duty, diesel dump truck. Three quotes for the new dump truck are provided below, and all include taxes, freight, and a Sourcewell discount:

Sewer Dump Truck Quote Summary			
Ken Grody Ford (Ken Grody Upfit)	\$ 92,383.72		
Tuttle Click Ford (Scelzi Upfit)	\$102,975.00		
National Auto Fleet (Plumbers Depot Upfit)	\$118,271.84		

In case there are minor adjustments to tax or freight, staff propose including a 5% contingency to cover these items.

Staff proposed an overall budget of \$1,000,000 for FY25-26 sewer vehicles and equipment and the table below summarizes vehicles already purchased and proposed to be purchased:

Sewer Vehicles and Equipment (Capital) Summary	
Sewer Pool Vehicle – EV (purchased, in use)	\$35,500
